WILMINGTON, Del., Oct. 3, 2013 /PRNewswire/ -- Energetic and animated designer and TV personality David Bromstad is dropping his

Bromstad has worked with DuPont to design a fun quiz that will determine which one of seven distinct design personalities match a homeowner's style to help in their quest to create personalized, inspiring kitchens and bathrooms using DuPont(TM) Corian(R) and Zodiaq(R) surfaces.

"Homeowners typically have one chance to design their kitchens and bathrooms, which are among the most used spaces in a home," said David Bromstad. "Our design tools help to make it easier and more rewarding by introducing homeowners to their design personality and giving them a color palette to work with."

After answering a few simple questions through a visual quiz, users are introduced to one of seven design personalities that best resonates with their style. Design personalities include:

- The Collector: Every piece in her home tells a story. The Collector mixes textures from found objects with more classic styles for a palette based on rich browns and dark lichen. Light is brought in by sunshine yellow and soft greens.
- The Socialite: The Socialite knows confidence is her best accessory. She's self-assured at home and at work -- always leading by example. Lighter grays and warm tones of sand are balanced by rich, jet black to create a feeling of luxury and longevity.
- The Multi-tasker: The Multi-Tasker approaches life at full force -- balancing and adjusting to the moment to meet it with exuberance. A family-friendly palette that is fresh, realistic, modern and classic -- and infused with a much-needed jolt of coffee.

- The Entertainer: With an eye for modern sophistication, the Entertainer is comfortable no matter where he is -- which is usually at the center of any situation. Graphic red and black contrast for a high-end feel, but are softened with warm taupe and golden yellow for a truly sophisticated theme.

- The Creator: The Creator loves anything quirky; what most people shy away from, he embraces. Mixed media, textures and inspirations make the color palette. From pairing water blues with coffee browns, this is experimentation at its bravest.

- The Naturalist: The Naturalist feels most at home in the great outdoors and strives to bring a sense of well-being into her home. Soft buttery browns complement light beige and cream tones while speckle textures commonly found in stone and granite inspire solid surfaces.

- The Traveler: The world is his inspiration. The Traveler mixes the best objects found in his travels -- things that have an international significance to his life -- to create a multi-cultural lifestyle. Anything exotic and unique is his normal; pottery clay, cobalt and indigo his color palette.
