Christmas is a time for traditions – but it can also be a time to make new traditions and go your own route! Classic Christmas colors like red and green or gold and silver will never go out of style. But if your style is a little more eclectic or you just want to try something new, you can still have a lovely holiday environment while breaking out of the norm and using non-traditional colors in your decorating – especially on your tree!

Creating modern and stylish holiday decor can really be as simple as taking your traditional holiday decor and changing up the colors, either by purchasing new ornaments or by spray painting a bit [like Corey demonstrated here](#). Check out this ombre Christmas tree from David Bromstad over at HGTV:

And as David says:

“Adding bold colors to your holiday scheme will make your home stand out from the rest. By adding something glass or crystal to your trees, and a neutral touch will allow the tree to stand out on its own.”
